

## **Package leaflet: Information for the patient**

### **Zirtene Allergy 10 mg film-coated tablets** cetirizine dihydrochloride

**Read all of this leaflet carefully before you start taking this medicine because it contains important information for you.**

Always take this medicine exactly as described in this leaflet or as your doctor or pharmacist have told you.

- Keep this leaflet. You may need to read it again.
- Ask your pharmacist if you need more information or advice.
- If you get any side effects, talk to your doctor or pharmacist. This includes any possible side effects not listed in this leaflet. See section 4.
- You must talk to a doctor if you do not feel better or if you feel worse after 3 days.

#### **What is in this leaflet:**

1. What Zirtene Allergy is and what it is used for
2. What you need to know before you take Zirtene Allergy
3. How to take Zirtene Allergy
4. Possible side effects
5. How to store Zirtene Allergy
6. Contents of the pack and other information

#### **1. What Zirtene Allergy is and what it is used for**

Cetirizine dihydrochloride is the active ingredient of Zirtene Allergy. Zirtene Allergy is an anti-allergy medication.

In adults and children aged 6 years and above, Zirtene Allergy is indicated:

- for the relief of symptoms of hay fever (seasonal allergic rhinitis) and allergies such as dust or pet allergies (perennial allergic rhinitis), such as sneezing, itchy, runny and blocked nose, red and watery eyes.
- for the relief of chronic nettle rash (chronic idiopathic urticaria).

#### **2. What you need to know before you take Zirtene Allergy**

##### **Do not take Zirtene Allergy**

- if you are allergic to cetirizine dihydrochloride or any of the other ingredients of this medicine (listed in section 6) or to hydroxyzine or to piperazine derivatives (closely related active substances of other medicines).
- if you have a severe kidney disease and are undergoing dialysis due to severe kidney failure

##### **Warnings and precautions**

Talk to your doctor or pharmacist before taking Zirtene Allergy

- if you have kidney problems. You may need to take a lower dose. The new dose will be determined by your doctor.
- if you have problems passing urine (e.g. spinal cord problems or prostate or bladder problems).
- if you have epilepsy or are at risk of convulsions, you should ask your doctor for advice.

If you need a skin (allergy) test, tell the doctor you are taking these tablets, as antihistamines can effect skin test results. You will need to stop treatment at least three days before the test.

### **Children**

This medicine is not recommended in children under 6 years.

### **Other medicines and Zirtene Allergy**

Tell your doctor or pharmacist if you are taking, have recently taken or might take any other medicines.

Due to the profile of cetirizine, no interactions with other medicines are expected.

### **Zirtene Allergy with alcohol**

It is recommended to avoid consumption of alcohol while taking this medicine.

### **Pregnancy and breast-feeding**

If you are pregnant or breast-feeding, think you may be pregnant or are planning to have a baby, ask your doctor or pharmacist for advice before taking this medicine.

As with other medicines, use of Zirtene Allergy should be avoided by pregnant women. Accidental use of this medicine by a pregnant woman should not cause any harmful effects on the foetus. Nevertheless, the use of this medicine should be discontinued once you find out you are pregnant.

You should not take Zirtene Allergy if you are breast-feeding because cetirizine passes into breast milk.

### **Driving and using machines**

Clinical studies have produced no evidence of impaired attention, alertness and driving capabilities after taking Zirtene Allergy at the recommended dose.

If you feel tired, less able to concentrate or think clearly, or feel unwell, after you have taken Zirtene you should not drive, take part in activities that may be dangerous or operate machinery. You should not exceed the recommended dose.

### **Zirtene Allergy contains lactose**

If you have been told by your doctor that you have an intolerance to some sugars, please contact your doctor before taking this medicinal product.

## **3. How to take Zirtene Allergy**

Always take this medicine exactly as described in this leaflet or as your doctor or pharmacist has told you. Check with your doctor or pharmacist if you are not sure.

### **Adults and adolescents above 12 years old:**

The recommended dose is 10 mg once daily as 1 tablet.

### **Children between 6 and 12 years old:**

The recommended dose is 5 mg twice daily (For this dosing regimen; a different formulation should be used).

### **Patients with moderate to severe kidney problems:**

The recommended dose for patients with moderate kidney problems is 5 mg once daily.

The recommended dose for patients with severe kidney problems is 5mg once every two days. For these dosing regimens; a different formulation should be used.

If you suffer from kidney disease, please contact your doctor or pharmacist before taking Zirtene Allergy.

If you feel that the effect of Zirtene Allergy is too weak or too strong, please consult your doctor.

The tablets need to be swallowed with a glass of liquid. The score line is only there to help you break the tablet if you have difficulty in swallowing it whole.

**Duration of treatment:**

The duration of treatment depends on the type, duration and course of your complaints and is determined by your doctor.

**If you take more Zirtene Allergy than you should**

If you think you have taken an overdose of Zirtene Allergy please inform your doctor.

Your doctor will then decide what measures, if any, should be taken.

After an overdose, the side effects described below may occur with increased intensity. Adverse effects such as confusion, diarrhoea, dizziness, tiredness, headache, ailing, dilating of pupil, itching, restlessness, sedation, sleepiness, loss of consciousness, abnormal rapid heart rate, tremors and not being able to pass urine have been reported.

**If you forget to take Zirtene Allergy**

Do not take a double dose to make up for a forgotten tablet.

If you have any further questions on the use of this product, ask your doctor or pharmacist.

**4. Possible side effects**

Like all medicines, this medicine can cause side effects, although not everybody gets them.
