

PACKAGE LEAFLET: INFORMATION FOR THE PATIENT

DRYNOL 20 MG TABLETS

bilastine

Read all of this leaflet carefully before you start taking this medicine because it contains important information for you.

- Keep this leaflet. You may need to read it again.
- If you have any further questions, ask your doctor or pharmacist.
- This medicine has been prescribed for you only. Do not pass it on to others. It may harm them even, if their signs of illness are the same as yours.
- If you get any side effects talk to your doctor or pharmacist. This includes any possible side effects not listed in this leaflet. See section 4.

What is in this leaflet:

1. What DRYNOL is and what it is used for
2. What you need to know before you take DRYNOL
3. How to take DRYNOL
4. Possible side effects
5. How to store DRYNOL
6. Contents of the pack and other information

1. What Drynol is and what it is used for

DRYNOL contains the active substance bilastine which is an antihistamine. DRYNOL is used to relieve the symptoms of hayfever (sneezing, itchy, runny, blocked-up nose and red and watery eyes) and other forms of allergic rhinitis in adults and adolescents aged 12 years and older. It may also be used to treat itchy skin rashes (hives or urticaria).

2. What you need to know before you take Drynol 20 mg tablets

Do not take Drynol:

if you are allergic to bilastine or any of the other ingredients of this medicine (listed in section 6).

Warnings and precautions

Talk to your doctor or pharmacist before using Drynol if you have moderate or severe renal impairment, low blood levels of potassium, magnesium, calcium, if you have or had heart rhythm problems or if your heart rate is very low, if you are taking medicines that may affect the heart rhythm, if you have or had a certain abnormal pattern to your heart beat (known as prolongation of the QTC interval on the Electrocardiogram) which can occur in some forms of heart disease and in addition you are taking other medicines (see "Other medicines and Drynol").

Children

Do not give Drynol 20 mg tablets to children under 12 years of age. For alternative dosage forms of bilastine suitable for use in children under 12 years of age, see Section 3 “Use in children”.

Do not exceed the recommended dose. If symptoms persist, consult your doctor.

Other medicines and Drynol

Tell your doctor or pharmacist if you are taking, have recently taken or might take any other medicines, including medicines obtained without a prescription.

In particular, please discuss with your doctor if you are taking any of the following medicines:

- Ketoconazole tablets (used to treat Cushing’s syndrome when the body produces an excess of cortisol)
- Erythromycin (an antibiotic)
- Diltiazem (to treat angina pectoris - pain or tightness in the chest area)
- Cyclosporine (to reduce the activity of your immune system, thus avoiding transplant rejection or reducing disease activity in autoimmune and allergic disorders, such as psoriasis, atopic dermatitis or rheumatoid arthritis)
- Ritonavir (to treat HIV)
- Rifampicin (an antibiotic)

DRYNOL tablets with food, drink and alcohol

These tablets should **not** be taken with **food or with grapefruit juice or other fruit juices**, as this will decrease the effect of bilastine. To avoid this, you can:

- take the tablet and wait for one hour before taking food or fruit juice or
- if you have taken food or fruit juice, wait for two hours before taking the tablet.

Bilastine, at the recommended dose (20 mg), does not increase the drowsiness produced by alcohol.

Pregnancy, breast-feeding and fertility

There are no or limited amount of data from the use of bilastine in pregnant women and during breast-feeding and on the effects on fertility.

If you are pregnant or breast-feeding, think you may be pregnant or are planning to have a baby, ask you doctor for advice before taking this medicine. Ask your doctor or pharmacist for advice before taking any medicine.

Driving and using machines

It has been demonstrated that bilastine 20 mg does not affect the driving performance in adults. However the response from each patient to the medicine may be different. Therefore you should check how this medicine affects you, before driving or operating machinery.

Drynol contains sodium

This medicine contains less than 1 mmol sodium (23 mg) per tablet, that is to say essentially 'sodium free'.

3. How to take Drynol

Always take this medicine exactly as your doctor or pharmacist have told you. Check with your doctor or pharmacist if you are not sure.

The recommended dose in adults, including the elderly and adolescents aged 12 years and over, is 1 tablet (20 mg) a day.

- The tablet is for oral use.
- The tablet must be taken one hour before or two hours after intake of food or fruit juice (see section 2, Drynol with food, drink and alcohol”).
- Swallow your tablet with a glass of water.
- The score line is only here to help you break the tablet if you have difficulty swallowing it whole.

Duration of treatment

Regarding the duration of treatment, your physician will determine the type of disease you are suffering from and will determine for how long you should take DRYNOL.

Use in children

Other forms of this medicine - bilastine 10 mg orodispersible tablets or bilastine 2.5 mg/mL oral solution - may be more suitable for children 2 to 11 years of age with a body weight of at least 15 kg - ask your doctor or pharmacist.

Do not give bilastine to children under 2 years of age with a body weight below 15 kg since no sufficient data are available.

If you take more DRYNOL than you should

If you, or anyone else, have taken too many DRYNOL tablets, contact your doctor or pharmacist **immediately** or go to the emergency department of your nearest hospital. Please remember to take this medicine pack or this leaflet with you.

If you forget to take DRYNOL

Do not take a double dose to make up for a forgotten dose.

If you forget to take your dose on time, take it as soon as possible, and then go back to your regular dosing schedule.

If you have any further questions on the use of this medicine, ask your doctor or pharmacist.

4. Possible side effects

Like all medicines, this medicine can cause side effects, although not everybody gets them.

If you experience symptoms of an allergic reaction the signs of which may include difficulty in breathing, dizziness, collapsing or losing consciousness, swelling of your face, lips, tongue or throat, and/or swelling and redness of the skin, stop taking the medicine and seek urgent medical advice straight away.

- eye irritation
- dizziness
- loss of consciousness
- diarrhoea
- nausea (the feeling of being sick)
- lip swelling
- eczema
- urticaria (hives)
- fatigue
- rhinitis (nasal irritation)
- stomach pain (abdominal /upper abdominal pain)

Reporting of side effects

If you get any side effects, talk to your doctor or pharmacist. This includes any possible side effects not listed in this leaflet. You can also report side effects directly via HPRA Pharmacovigilance, website: www.hpra.ie. By reporting side effects you can help provide more information on the safety of this medicine.

5. How to store Drynol

Keep this medicine out of the sight and reach of children.

Do not use this medicine after the expiry date which is stated on the carton and the blisters after EXP. The expiry date refers to the last day of that month.

This medicine does not require any special storage conditions.

Do not throw away any medicines via wastewater or household waste. Ask your pharmacist how to throw away medicines you no longer use. These measures will help to protect the environment.

6. Contents of the pack and other information

What DRYNOL contains:

- The active substance is bilastine. Each tablet contains 20 mg of bilastine.
- The other ingredients are cellulose microcrystalline, sodium starch glycolate type A (derived from potato), colloidal anhydrous silica, magnesium stearate.

See section 2 “Drynol contains sodium”

What DRYNOL looks like and contents of the pack:

DRYNOL tablets are white, oval, biconvex and scored (length 10 mm, width 5 mm).

The tablets are supplied in blisters of 10, 20 , 30, 40 or 50 tablets

Not all pack sizes may be marketed.
