

PACKAGE LEAFLET: INFORMATION FOR THE USER

Diprobase[®] Cream

Read all of this leaflet carefully before you start using this medicine.

- Keep this leaflet. You may need to read it again.
- If you have any further questions, ask your doctor or pharmacist.
- This medicine has been prescribed for you. Do not pass it on to others. It may harm them, even if their symptoms are the same as yours.
- If any of the side effects gets serious, or if you notice any side effects not listed in this leaflet, please tell your doctor or pharmacist.

The name of your medicine is Diprobase Cream but it will be referred to as Diprobase throughout the leaflet.

In this leaflet:

1. What Diprobase is and what it is used for
2. Before you use Diprobase
3. How to use Diprobase
4. Possible side effects
5. How to store Diprobase
6. Further information

1. WHAT DIPROBASE IS AND WHAT IT IS USED FOR

Diprobase is an emollient, moisturising and protective cream. It helps to soothe, smooth and hydrate the skin and prevent moisture loss.

In adults and children, Diprobase Cream is used to treat red, inflamed, damaged, dry or chapped skin and to protect raw skin areas. If you are suffering from a skin condition called eczema, and your skin is dry, the cream can be applied before having a bath, to prevent your skin from drying even further.

Eczema is a common skin disease, which causes the skin to become red and itchy.

2. BEFORE YOU USE DIPROBASE

Do not use Diprobase

- if you, or your child, have ever had an allergic reaction to Diprobase or any of its ingredients.

Ask your doctor or pharmacist if you are not sure.

Important information about some of the ingredients of DIPROBASE

Diprobase cream contains chlorocresol and cetostearyl alcohol which may rarely cause skin reactions (e.g. contact dermatitis) or allergic reactions. If you are worried about this or any other effects, you should contact your doctor or pharmacist.

3. HOW TO USE DIPROBASE

Always use Diprobase exactly as your doctor has told you. You should check with your doctor or pharmacist if you are not sure.

For adults and children, the cream should be applied thinly to cover the affected area completely, massaging gently and thoroughly into the skin.

If the symptoms persist or the condition worsens, stop using the cream and consult your doctor or pharmacist.

If you forget to use Diprobase

If you forget to use Diprobase at the right time, use it as soon as you remember, then carry on as before.

4. POSSIBLE SIDE EFFECTS

Like all medicines, Diprobase can cause side effects, although not everybody gets them.

If your symptoms persist or the condition worsens, stop using the cream and consult your doctor or pharmacist.

Skin reactions including itching, rash, redness, peeling, burning, pain, dryness and skin inflammation (dermatitis) have been reported with product use.

If you are worried by this or any other effects, you should tell your doctor or pharmacist.

Reporting side effects

If you get any side effects, talk to your doctor, pharmacist or nurse. This includes any possible side effects not listed in this leaflet. You can also report side effects directly via HPRAs Pharmacovigilance, Earlsfort Terrace, IRL - Dublin 2; Tel: +353 1 6764971; Fax: +353 1 6762517. Website: www.hpra.ie; E-mail: medsafety@hpra.ie.

By reporting side effects you can help provide more information on the safety of this medicine.

5. HOW TO STORE DIPROBASE

Keep out of the reach and sight of children.

The cream should not be stored above 25°C.

Do not use the cream after the expiry date 'Exp' which is printed on the carton/tube label after 'Exp'. The expiry date refers to the last date of that month.

Medicines should not be disposed of via wastewater or household waste. Ask your pharmacist how to dispose of medicines no longer required. These measures will help protect the environment.

6. FURTHER INFORMATION
